The Samsung Galaxy Note 2 Root AT&T Note 2 on the latest OTA Android 4.3 with UCUBMK6 Firmware.

redmi note 3 recovery firmware

To address these issues, Samsung rolled out few more updates which make the firmware more reliable than previous ones.

redmi note 7 pro recovery firmware

Also, you'll see "Addid" text appeared in message box in case your ID: CDM box doesn't turn to blue then you'll need to install Samsung drivers. While holding these two buttons, simply press Power key till you see the warning message appeared on your phone screen. There are high chance that your device will be bricked if you flash this firmware on any other device than Grand Duos. Please confirm your device's model number before you proceed further. You can check it by following this path on your phone: Home Screen -> Menu -> Settings -> About device. Implementing this guide on any other model / device (including P9 L / P9 08 0) than the mentioned one might give you undesired results. [elk4156d](#)
